TO WHOM SO EVER IT MAY CONCERN

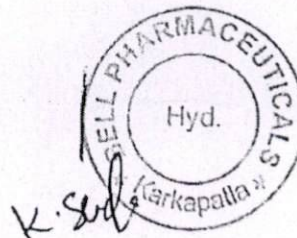

This is to certify that **Miss. KARRA SILPA** is a bonafide student of **Narayana Pharmacy College, Nellore-524002**. She has undergone industrial training in our organization from **05th September-2021 to 04th October-2021**. As part of partial fulfillment of her B. Pharmacy course bearing Hall Ticket No. **184Q1R0035**.

During the training period she had interacted with Quality control, Quality Assurance & Production Departments In charges and acquired basic knowledge in these areas.

During this aforesaid period, we found her hardworking, sincere and learning attitude.

We Wish Her A Bright Future.

REPORT

TITLE : EDUCATIONAL EQUITY AND INCLUSION

RESOURCE PERSON: Y. ROHAN VARMA from SEVEN HILLS COLLEGE OF PHARMACY

DATE : 16-12-2021

TARGET GROUP : 4th Pharm D

REPORT:

The seminar on Educational Equity and Inclusion offered critical insights into advancing fairness and inclusivity within educational settings. The key outcomes from the seminar underscore the importance of differentiating equity from equality and adopting practices that address diverse student needs effectively.

Understanding Equity vs. Equality

A significant focus was on the distinction between equity and equality. While equality involves providing the same resources to all students, equity requires tailoring support to meet individual needs, ensuring that all students, regardless of their starting point, have an equal opportunity to succeed. This involves personalized resources and targeted interventions for students from disadvantaged backgrounds.

Promoting Inclusive Practices

The seminar highlighted the adoption of culturally responsive teaching as a means to engage students by integrating their cultural backgrounds into the curriculum. This approach fosters a sense of belonging and relevance. Additionally, Universal Design for Learning (UDL) was

discussed as a framework to accommodate various learning styles and needs, enhancing accessibility through multiple means of representation, expression, and engagement.

Addressing Systemic Challenges

Key challenges addressed included recognizing and combating implicit biases that can affect educational outcomes. Training for educators on cultural competence and anti-bias strategies is crucial for creating an equitable learning environment. Moreover, ensuring equitable access to resources such as technology and academic support—is essential for addressing systemic disparities.

Engaging Stakeholders

Effective inclusion requires the active involvement of families, communities, and students. Building strong partnerships and incorporating student feedback into educational practices helps foster a supportive and inclusive environment.

Measuring Progress

The seminar emphasized the use of data-driven approaches to monitor the effectiveness of equity initiatives and the need for ongoing professional development to keep educational practices responsive and effective.

In conclusion, the seminar reinforced the importance of implementing strategies that ensure educational equity and inclusion. By addressing individual needs, adopting inclusive practices, and engaging all stakeholders, educational institutions can create environments where every student has the opportunity to thrive.

REPORT:

TITLE: GLOBAL PERSPECTIVES ON PHARMACEUTICAL PATENTS AND IPR

RESOURCE PERSON: DR. D. GIRI from DKW College

Date: 17-09-2021

On September 15, 2021, Narayana Pharmacy College hosted a seminar titled "Global Perspectives on Pharmaceutical Patents and IPR," presented by Dr. D. GIRI, an expert in the field of intellectual property rights (IPR) with extensive knowledge of pharmaceutical patents.

The seminar commenced with an introduction to the fundamental concepts of IPR, emphasizing its significance in the pharmaceutical industry. Dr. D. GIRI explained how patents serve as a crucial tool for protecting innovations and encouraging research and development. He elaborated on the different types of patents, including product patents and process patents, and their respective roles in safeguarding intellectual property.

A significant portion of the seminar was dedicated to discussing the global landscape of pharmaceutical patents. Ganesan provided a comparative analysis of patent laws across different countries, highlighting the variations and commonalities. He emphasized the importance of understanding these differences for multinational pharmaceutical companies aiming to navigate the complex global market. He also touched upon the impact of international agreements such as the Trade-Related Aspects of Intellectual Property Rights (TRIPS) on the harmonization of patent laws.

Another key area covered was the challenges and opportunities associated with pharmaceutical patents. Ganesan addressed issues such as patent ever greening, compulsory licensing, and the balance between innovation and accessibility. He underscored the ethical considerations in patenting life-saving medications and the need for policies that ensure affordable access to essential drugs while rewarding innovation.

11/03/2022

REPORT

Name of the activity: The Future of Pharmaceutical R&D: Challenges and Opportunities

Date: 10/03/2022

On 10/03/2022, Narayana Pharmacy College hosted an insightful and impactful session titled "The Future of Pharmaceutical R&D: Challenges and Opportunities," led by the esteemed S. Pawan Kumar. The event attracted a diverse audience of students, faculty, and industry professionals, all eager to explore the rapidly evolving landscape of pharmaceutical research and development (R&D).

S. Pawan Kumar, a distinguished figure in the pharmaceutical industry, commenced the session by providing an overview of the current state of pharmaceutical R&D. He acknowledged the remarkable advancements made over recent decades, particularly in fields such as biotechnology, genomics, and personalized medicine. However, he also drew attention to the significant challenges that the industry continues to face.

A primary challenge discussed was the high cost and lengthy timelines associated with drug development. On average, bringing a new drug to market can take over a decade and cost upwards of billions of dollars. This challenge is compounded by the high failure rate, with many promising compounds failing during late-stage clinical trials. Kumar emphasized the urgent need for more efficient R&D processes to mitigate these exorbitant costs and improve success rates.

Kumar also addressed the regulatory challenges facing the industry. While stringent requirements for safety and efficacy are essential for patient safety, they often slow down the approval process. He stressed the necessity of finding a balance between maintaining rigorous regulations and ensuring timely access to new therapies. This involves the adoption of adaptive regulatory frameworks that can expedite the approval process for innovative treatments without compromising safety.

Email: principal.npc@narayanagroup.com Visit us:www.narayanapharmacycollege.com

The session highlighted the transformative potential of digital technologies and big data analytics. Kumar illustrated how these technologies can revolutionize drug discovery and development by enabling more precise targeting of therapies, improving clinical trial design, and enhancing patient monitoring. He showcased examples of how artificial intelligence (AI) and machine learning (ML) can identify potential drug candidates more efficiently than traditional methods, thus speeding up the R&D process.

In conclusion, S. Pawan Kumar's session at Narayana Pharmacy College offered a comprehensive and forward-looking perspective on the future of pharmaceutical R&D. Despite the substantial challenges, the integration of advanced technologies, regulatory reforms, collaborative efforts, and the shift towards personalized medicine hold great promise for overcoming these hurdles. The session left attendees with a renewed sense of optimism and a clearer understanding of the path forward in pharmaceutical R&D, inspiring them to contribute to the future of medical innovation.

CIRCULAR

We glad to inform Narayana Pharmacy College, Nellore is going to conduct seminar on "Emerging trends, challenges and innovative approaches in clinical research" by Ethos Clinical Research in the campus at 27/11/2021 at 03.00 PM. This is to inform that all the II-year & III-year B. Pharmacy students should participate in the seminar without fail.

REPORT

NAME OF THE PROGRAM	<i>Emerging trends, challenges and innovative approaches in clinical research</i>
Speaker	Dr. P. sankar M. Pharm,(PhD),Associate Professor, y, Nellore
Target Audience	II &III B. Pharm Students
Date	27-11-2021
Time	03.00 pm – 05.00 pm

Goals:

- Pharmacology experiments can be done by computer assisted learning software
- Experiment on effects of various drugs (Mydriatic, Miotic and Local Anaesthetic) on rabbit's eye.
- Study of Analgesic activity with the help of "Tail Flick Apparatus" (Analgesiometer).

Manufacturing and trial enhancement Well-developed pharmaceutical software allows pharma companies to automate and optimize their R&D operations and clinical trials. Dept of Pharmacology, Narayana Pharmacy college, Nellore organized workshop on Ex pharma series software. The speaker delivered excellent info about essential fundamentals for performing software. She explained computer assisted learning (CAL) software containing various programs which simulate animal experiments in Pharmacology. These programs can be used to demonstrate effect of drugs on different animals systems. The programme was very useful for students. B. Pharmacy II and III-year students were participated in the programme and felt that program was very useful. At the eve of the program, oral feedback was collected and students

Report:

TITLE: PATENT FILING AND PROTECTION STRATEGIES FOR PHARMACEUTICAL INNOVATIONS

RESOURCE PERSON: M.BALAJI GANESAN

Date : 20-08-2021

On August 19, 2021, Narayana Pharmacy College organized an insightful seminar titled "Patent Filing and Protection Strategies for Pharmaceutical Innovations," led by M. Balaji Ganesan, a distinguished expert in intellectual property rights (IPR) and pharmaceutical patents.

The seminar opened with Ganesan providing a comprehensive overview of the importance of patents in the pharmaceutical industry. He explained that patents are vital for protecting novel pharmaceutical inventions, incentivizing innovation, and ensuring a competitive edge in the market. The presentation began with a detailed breakdown of the patent filing process, including the requirements for patentability such as novelty, non-obviousness, and industrial applicability.

Ganesan discussed various strategies for effective patent filing, emphasizing the importance of thorough prior art searches to avoid infringement issues. He highlighted the significance of drafting robust patent applications with precise claims to ensure comprehensive protection of the invention. The resource person also elaborated on the differences between provisional and non-provisional patent applications, advising on when and how to use each type to maximize protection.

A major portion of the seminar was devoted to discussing protection strategies post-patent filing. Ganesan outlined the procedures for maintaining and enforcing patents, including regular payment of maintenance fees and monitoring for potential infringements. He explained the concept of patent portfolios and the strategic use of multiple patents to protect different aspects of a single innovation.

Ganesan also touched upon international patent protection mechanisms, such as the Patent Cooperation Treaty (PCT), which allows for simultaneous patent protection in

multiple countries. He provided insights into navigating the complexities of filing patents in various jurisdictions and the importance of understanding local patent laws and regulations.

The seminar concluded with a discussion on common challenges faced in patent protection, such as patent trolls and litigation. Ganesan offered practical advice on how to mitigate these risks and defend patents effectively. He also discussed recent trends in pharmaceutical patents, including the rise of biosimilars and the impact of emerging technologies on patent strategies.

Throughout the seminar, Ganesan engaged the audience with interactive Q&A sessions, addressing specific concerns and queries from participants. The attendees, which included students, faculty, and industry professionals, gained valuable knowledge on the intricacies of patent filing and protection strategies tailored to pharmaceutical innovations.

In summary, the seminar provided a thorough understanding of the critical aspects of patent filing and protection, equipping participants with the tools and strategies necessary to safeguard their pharmaceutical innovations in a competitive global market.

Report

Title: Seminar on Getting acquired with Writing Thesis using Computer Tools

Target Group: Final Year UG, Interns and post graduate students.

Total Hours: 2 hrs

Outcome:

- ☉ Understand the significance of value inputs to write thesis.
- ☉ Distinguish between different types of computer tools.
- ☉ Understand how to overcome plagiarism

Writing of thesis is very crucial for every pharmacy student whether he is B. Pharm, M. Pharm or PhD. In this regard Narayana Pharmacy College organized a seminar. Mr. Kiran Kumar, C.E.O, RISE Institutions took the session wonderfully. He explored different software's which can apply while writing the Thesis. He explained easy techniques to break the glass ceilings of Thesis writing. He also explained clinical trainings which will be conducted by their organization. Faculty and Students were very much impressed with the seminar and doubts raised by students were clarified by speaker. End of the day program was grand success and Principal and staffs were felicitated the Speaker.

26/05/2022

REPORT

TITLE: Integrating practical skills and research in pharmaceutical programs

RESOURCE PERSON : T. Vamsi

Date : 26/05/2022

On May 25, 2022, Narayana Pharmacy College hosted an insightful session led by T. Vamsi, focused on the integration of practical skills and research within pharmaceutical education. This event underscored the vital role that hands-on experience and research activities play in shaping competent and innovative professionals in the pharmaceutical field.

The session began with T. Vamsi emphasizing the evolving landscape of pharmaceutical sciences, where the demand for skilled practitioners who can bridge the gap between theoretical knowledge and practical application is ever-increasing. He pointed out that pharmaceutical programs must adapt to these changes by incorporating practical skills and research components into their curricula.

One of the key highlights of the discussion was the necessity of practical skills in pharmaceutical education. T. Vamsi elaborated on various methods to enhance these skills, including laboratory work, internships, and simulation-based learning. He stressed that these practical experiences not only reinforce theoretical concepts but also prepare students for real-world challenges they will face in their professional careers.

In addition to practical skills, the integration of research was identified as a cornerstone of advanced pharmaceutical education. T. Vamsi highlighted that engaging students in research projects fosters critical thinking, problem-solving abilities, and innovation. He shared success stories of students who had undertaken research projects and made significant contributions to the field, thus demonstrating the tangible benefits of research-oriented education.

Furthermore, T. Vamsi discussed the importance of collaboration between academia and industry. He advocated for partnerships that allow students to work on industry-relevant research projects, providing them with exposure to current trends and practices. Such collaborations also offer networking opportunities and can pave the way for future employment.

The session concluded with a call to action for educational institutions to continually revise and update their programs to include more practical and research-oriented components. T. Vamsi encouraged faculty members to adopt a student-centered approach, focusing on experiential learning and mentorship. He also urged students to actively seek out

opportunities for practical and research experiences, as these are crucial for their professional development.

Overall, the event was a compelling reminder of the necessity to integrate practical skills and research within pharmaceutical programs. T. Vamsi's insights provided valuable guidance for educators and students alike, aiming to produce well-rounded, skilled professionals ready to meet the demands of the pharmaceutical industry.

COLLABORATIVE ACTIVITY CONDUCTED BETWEEN NARAYANA PHARMACY COLLEGE & SAI REKHA GENERIC MEDICALS

Title	Medication Dispensing Training
Date	16/02/2022 to 22/02/2022
Duration	07 Days
Place	Sai Rekha generic medicals, NELLORE
Students Participated	3
Description	Students of III Pharm. D were trained at The Pharma Generic House to learn about safe dispensing of drug, inventory control, storage of drug, maintaining records of different types of scheduled drugs, design and layout of community pharmacy.

Students are dispensing medicines to patients

Report on drug dispensing

Drug dispensing is a clinical pharmacy service that promotes access to medicines and their rational use. Drug dispensing improves the health outcomes of patients attending community pharmacies. Most articles included in this review reported a positive influence of drug dispensing performed by community pharmacists on patients' health outcomes. This Training increases pharmacists drug dispensing knowledge, decision makers, and healthcare systems, since they may contribute to evidence-based decision-making, strengthening the contribution of community pharmacists to health care.

To
The Principal,
Narayana pharmacy college,
Nellore.(A.P).

Dear sir,

This is certify that the following IVPharm.D students from Narayana pharmacy College have successfully completed their Seven days Drug Dispensing Training program. under my guidance dated:16/02/2022 to 22/02/2022.

Names of the students

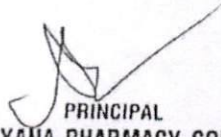

V.Bhavya (194Q1R0029)

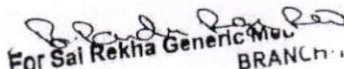

S.Meenakshi (194Q1R0025)

N.Aneesa (194Q1R0017)

They have shown sincerity and dedication on their work

Thanking you

CIRCULAR

This is to inform all the 4th BPHARM students that a seminar by **K. Kiran kumar** from **Sri Padmavathi school of Pharmacy** on "ETHICAL CONSIDERATIONS IN PHARMACEUTICAL RESEARCH" has been scheduled for 29-07-2021 at 11.00 am onwards in the seminar hall. Hence, 4th B.PHARM students are hereby informed that they must attend the seminar and make the programme successful.

REPORT

**TITLE : ETHICAL CONSIDERATIONS IN
PHARMACEUTICAL RESEARCH**
RESOURCE PERSON: K. Kiran kumar
Date : 29-07-2021
TARGET GROUP : 4th BPHARM

1. Introduction

The seminar on "Ethical considerations in the pharmaceutical industry" Aimed to address the complex ethical issues that pervade the pharmaceutical sector. The session explored various aspects of pharmaceutical ethics, including drug pricing, clinical trial practices, marketing strategies, and global health equity. This report provides an overview of the key discussions and outcomes from the seminar.

2. Objectives of the seminar

- To understand the major ethical dilemmas faced by the pharmaceutical industry.
- To discuss the impact of regulatory frameworks on ethical practices.
- To evaluate the implications of drug pricing and access to medications.
- To examine the ethical considerations in clinical trials and research.
- To explore issues related to marketing and conflict of interest.
- To identify strategies for promoting ethical practices in the industry.

3. Key topics and discussions

PRINCIPAL

Email: principal.npc@narayanagroup.com Visit us:www.narayanapharmacycollege.com

A. Ethical dilemmas in drug pricing

- **Discussion:** The seminar highlighted how high drug prices can restrict access to essential medications, particularly in low-income regions. The balance between the need for pharmaceutical companies to recoup research and development costs and the need for affordable access to drugs was discussed.
- **Outcome:** Participants discussed potential solutions, including policy reforms and alternative pricing models, to make medications more accessible without compromising the financial viability of pharmaceutical companies.

B. Clinical trials and research ethics

- **Discussion:** Key issues included ensuring informed consent, the use of placebos, and transparency in reporting trial results. The ethical treatment of participants and the need for rigorous standards in clinical trials were emphasized.
- **Outcome:** Attendees were encouraged to advocate for stricter adherence to ethical guidelines and to support policies that enhance transparency and protect participants' rights.

C. Marketing and conflict of interest

- **Discussion:** The influence of pharmaceutical marketing on healthcare professionals and prescribing practices was scrutinized. The potential for conflicts of interest when companies fund research or educational programs was also explored.
- **Outcome:** Strategies for managing conflicts of interest and promoting ethical marketing practices were discussed, including the implementation of clear disclosure requirements and independent review processes.

D. Global health equity

PRINCIPAL

Phone & Fax No :0861-2317966; Cell No :+91- 9392901053
Email: principal.npc@narayanagroup.com Visit us:www.narayanapharmacycollege.com

- **Discussion:** The seminar addressed the ethical implications of distributing medications and vaccines globally, especially in underserved areas. The role of pharmaceutical companies in addressing health disparities was a key focus.
- **Outcome:** Recommendations included supporting initiatives that improve access to medications in low-income regions and engaging in partnerships with global health organizations to address health inequalities.

E. Future trends and challenges

- **Discussion:** Emerging trends such as personalized medicine and digital health technologies were examined for their ethical implications. The potential for artificial intelligence to revolutionize drug development while raising new ethical questions was also discussed.
- **Outcome:** Participants were encouraged to stay informed about these trends and to consider their ethical implications in future research and practice.

4. Conclusion and recommendations

The seminar provided valuable insights into the ethical considerations inherent in the pharmaceutical industry. Key recommendations include:

- Advocating for transparent and fair drug pricing models.
- Promoting adherence to ethical standards in clinical trials.
- Implementing strategies to manage conflicts of interest in marketing and research.
- Supporting global health initiatives to improve medication access.
- Staying informed about emerging trends and their ethical implications.

Visitors: B.Pharmacy II Year Students

Objective: To observe and understand the pasteurization technique and temperature level controls in a dairy farm.

On the 15 of Feb, 2022, the second-year B.Pharmacy students embarked on an educational visit to the Vijaya Milk Dairy. The primary objective of this visit was to gain firsthand knowledge of the pasteurization process and the associated temperature controls that are crucial in dairy production. This visit was not only an opportunity to observe theoretical concepts in a practical setting but also to understand the importance of these processes in ensuring the safety and quality of milk products.

Introduction to Vijaya Milk Dairy

Vijaya Milk Dairy is a well-known dairy farm that specializes in the production of various milk products. It is renowned for its stringent quality control measures and advanced processing techniques. The dairy follows meticulous procedures to ensure that the milk and milk products are safe for consumption and meet high-quality standards.

Pasteurization Process

The students were introduced to the pasteurization process, which is a critical step in milk processing. Pasteurization involves heating the milk to a specific temperature for a set period to kill harmful bacteria without affecting the nutritional value and taste of the milk.

Key Steps in Pasteurization:

PRINCIPAL
NARAYANA PHARMACY COLLEGE
NELLORE - 524 002.

NARAYANA PHARMACY COLLEGE

(Approved by PCI & AICTE, New Delhi) (Affiliated to JNTUA Ananthapuram)
Recognized u/s 2(f) & 12(B) of the UGC Act, 1956, New Delhi,
ISO 9001:2015 Certified Institution
Chinthareddypalem, Nellore-524003, A.P. India.
Phone & Fax No :0861-2317966; Cell No :+91- 9392901053
Email: principal.npc@narayanagroup.com Visit us:www.narayanapharmacycollege.com

1. **Receiving and Testing Milk:** The raw milk is first received from the farms and tested for quality and contaminants. Only milk that passes these tests is allowed to proceed to the pasteurization process.
2. **Preheating:** The milk is preheated to a lower temperature before pasteurization to remove any air and to prepare it for the next step.
3. **Pasteurization:** The preheated milk is then heated to a temperature of at least 72°C (161°F) for 15 seconds in a high-temperature short time (HTST) pasteurizer. This temperature and time combination is effective in destroying harmful pathogens like Salmonella, E. coli, and Listeria.
4. **Cooling:** After pasteurization, the milk is rapidly cooled to a temperature of 4°C (39°F) to prevent the growth of any remaining microorganisms.
5. **Storage:** The pasteurized milk is then stored in sanitized tanks before being packaged for distribution.

Temperature Level Controls

Temperature control is a critical aspect of the pasteurization process and overall milk processing. The students learned about the various stages where temperature control is essential:

- **Receiving and Storage:** The raw milk is stored at a low temperature to prevent spoilage and bacterial growth before it is processed.
- **Preheating:** Controlled preheating ensures that the milk reaches the required temperature for effective pasteurization without denaturing the proteins.
- **Pasteurization:** Precise control of the pasteurization temperature is crucial. The equipment used is calibrated regularly to maintain the correct temperature and time settings.
- **Cooling:** Rapid cooling is necessary to prevent the growth of thermophilic bacteria and to maintain the quality of the milk.

- **Storage and Distribution:** The final product is stored at 4°C or below and transported in refrigerated vehicles to ensure it remains safe for consumption.

Observations and Learning Outcomes

During the visit, the students observed the entire pasteurization process and the stringent temperature controls in place. They gained insights into the importance of maintaining hygiene and sanitation throughout the process. The students also understood the role of technology and automation in ensuring consistent quality and safety in dairy production.

Conclusion

The visit to Vijaya Milk Dairy was an enlightening experience for the B. Pharmacy II Year students. It provided them with a comprehensive understanding of the pasteurization process and the critical role of temperature control in dairy processing. The knowledge gained from this visit will be invaluable in their future careers, especially for those interested in pharmaceutical applications related to food and nutrition.

Overall, the visit emphasized the importance of quality control in food processing and the need for rigorous standards to ensure consumer safety. The students left with a greater appreciation of the complex processes involved in dairy production and the scientific principles that underpin them.

TITLE: PROMOTING ETHICAL STANDARDS IN PHARMACEUTICAL EDUCATION AND RESEARCH

RESOURCE PERSON : K.RAM KUMAR

Date : 11-11-2021

REPORT:

On November 11, 2021, Narayana Pharmacy College hosted a seminar titled "Promoting Ethical Standards in Pharmaceutical Education and Research," featuring K. Ram Kumar as the distinguished resource person. The seminar focused on the crucial role of ethics in the pharmaceutical field, emphasizing the need for integrity and moral conduct in both education and research.

Mr. Kumar began by outlining the fundamental principles of ethics in the pharmaceutical industry. He stressed the importance of honesty, transparency, and accountability in all professional activities. The seminar highlighted that ethical standards are not just theoretical concepts but practical guidelines that should govern everyday actions and decisions in the pharmaceutical sector.

A significant portion of the seminar was dedicated to discussing the ethical challenges faced by pharmaceutical professionals. Mr. Kumar pointed out issues such as data fabrication, plagiarism, and conflicts of interest that can undermine the credibility of research and education. He underscored the detrimental effects these unethical practices can have on public trust, scientific progress, and patient safety.

To address these challenges, Mr. Kumar proposed several strategies. He advocated for the implementation of robust ethical training programs in pharmaceutical education to equip students with the knowledge and skills to navigate ethical dilemmas. Additionally, he emphasized the importance of establishing clear ethical guidelines and policies within educational and research institutions. These measures, he argued, are essential for fostering a culture of integrity and responsibility.

Mr. Kumar also highlighted the role of mentorship in promoting ethical standards. He encouraged experienced professionals to serve as role models and mentors for younger colleagues, guiding them in ethical decision-making and professional conduct. This, he suggested, would help inculcate a strong ethical foundation in the next generation of pharmaceutical professionals.

The seminar concluded with an interactive session, where attendees had the opportunity to ask questions and engage in discussions with Mr. Kumar. This session

provided valuable insights and allowed participants to explore practical solutions to ethical issues in their own professional contexts.

In summary, the seminar on "Promoting Ethical Standards in Pharmaceutical Education and Research" was a highly informative and thought-provoking event. K. Ram Kumar's expertise and insights highlighted the critical importance of ethics in the pharmaceutical field and offered practical strategies for maintaining high ethical standards. The event reinforced the commitment of Narayana Pharmacy College to fostering ethical excellence in pharmaceutical education and research.

To: 4th Year Pharm.D Students

Subject: Seminar on "Pharmacy and Public Health: Careers that Create Positive Change"

Dear Students,

We are excited to announce a seminar titled "Pharmacy and Public Health: Careers that Create Positive Change," featuring Dr. K. Vidhyadhar from CHIPS College, Guntur. The seminar is scheduled for 23rd March 2022 at 10:00am in Seminar hall. This seminar will explore how careers in pharmacy can significantly impact public health and contribute to positive societal outcomes. Dr. Vidhyadhar will provide valuable insights into the various career paths within the field of pharmacy that play a crucial role in improving public health. Your participation in this seminar is highly encouraged as it will enrich your understanding and open up new perspectives on how you can make a meaningful difference in public health through your career. All the above students attend the seminar.

Program Report

Title: Pharmacy and Public Health: Careers that Create Positive Change

Speaker: Dr. K. Vidhyadhar, CHIPS College, Guntur

Date: 23rd March 2022

Venue: Seminar hall

Time: 10am

Introduction:

On 23rd March 2022, a seminar titled "Pharmacy and Public Health: Careers that Create Positive Change" was conducted for the 4th Year Pharm.D students at [Insert Institution]. Dr. K. Vidhyadhar from CHIPS College, Guntur, delivered a compelling presentation on the crucial intersection between pharmacy and public health, highlighting how various career paths in pharmacy can contribute to meaningful improvements in public health outcomes.

Objective:

The primary goal of the seminar was to provide students with a deeper understanding of the diverse career opportunities available in pharmacy that have a significant impact on public health. Dr. Vidhyadhar aimed to inspire students by illustrating how their future roles as pharmacists could drive positive change in communities and public health systems.

Summary of the Seminar:

The seminar began with a welcome address by [Insert Host's Name], who introduced Dr. Vidhyadhar and outlined the seminar's objectives. Dr. Vidhyadhar then proceeded to deliver his presentation, covering the following key areas:

1. **Pharmacy's Role in Public Health:** Dr. Vidhyadhar started by explaining the integral role that pharmacy plays in public health. He discussed how pharmacists contribute to the prevention, management, and treatment of diseases, thereby enhancing overall community health. He emphasized that pharmacists are not just medication experts but also vital public health advocates.
2. **Career Pathways in Pharmacy with a Public Health Focus:** The speaker outlined various career paths within pharmacy that directly impact public health, including roles in public health agencies, community health programs, and research. He provided examples of how pharmacists work in areas such as epidemiology, health policy, and patient education to address public health challenges.
3. **Case Studies and Success Stories:** Dr. Vidhyadhar shared several case studies and success stories of pharmacists who have made significant contributions to public health. These examples highlighted innovative approaches and the positive outcomes achieved through their work, illustrating the real-world impact of careers in this field.
4. **Skills and Competencies Required:** The seminar also covered the essential skills and competencies needed for a successful career in pharmacy with a focus on public health. Dr. Vidhyadhar emphasized the importance of skills such as communication, critical thinking, and community engagement.
5. **Future Trends and Opportunities:** Dr. Vidhyadhar concluded by discussing emerging trends in public health and how they might influence the future roles of pharmacists. He encouraged students to stay informed about new developments and to seek opportunities for continuous learning and professional growth.

Feedback:

The seminar was well-received by the students, who found Dr. Vidhyadhar's insights both inspiring and informative. Students appreciated the practical examples and the detailed exploration of career options that align with their aspirations to make a positive impact in public health. The interactive Q&A session was particularly valued, providing students with the opportunity to engage directly with the speaker and address their specific questions.
