Chatra Samvidhi is one practice in Narayana Pharmacy College, Nellore for the academic enrichment and leadership development. This indicates a collective term to denote academic enrichment and leadership development.

Plan for implemented for Pharmaceutical Incompatibilities Discussion Forum in Pharmaceutics subject of B.Pharmacy First Year in 2023-2024

Table no. 1. Plan for Conducting a Pharmaceutical Incompatibilities Discussion Forum

This Table no. 1. Outlines the core objectives, implementation strategies, and expected outcomes for a pharmaceutical incompatibilities discussion forum.

Core Objective	Implementation	Expected Outcome
Enhance knowledge sharing	<ul style="list-style-type: none">* Different types of incompatibilities were listed out.* Students are encouraged to share case studies and experiences.	Pharmaceutical incompatibilities knowledge and understanding is increased. Prevention and management of incompatibilities is improved.
Facilitate problem-solving	<ul style="list-style-type: none">* Some incompatibility examples were given and asked to solve which improves thinking capabilities. Simple problem solving exercises are given.* Student to student collaborative and think pair share discussion arranged.* 3 pharmaceutics subject expertise paneled the discussion.* After simple exercise rating system was framed for it.	Effective solutions to complex incompatibility challenges. Improved patient safety through error prevention. Strengthened problem-solving skills among participants.

Plan for implementing a Discussion Forum for Therapeutic Drug Monitoring (TDM) in Pharm.D 5th Year

PRINCIPAL

Table no. 2. Plan for implementing a Discussion Forum for Therapeutic Drug Monitoring (TDM) in Pharm.D 5th Year

Concepts of TDM discussion forum	Implementation Steps	Practice	Expected Outcome
pharmacokinetic principles applications	Pharmacokinetic concepts were collected for antibiotic class of drugs into forum discussions. Students are encouraged to apply these principles to real-world scenarios.	Case studies taken and they formed base learning, problem-solving activities	Improved understanding of pharmacokinetic principles and their application in TDM
Interpretation of laboratory data	Provide opportunities for students to interpret TDM results and correlate them with clinical outcomes.	Data analysis exercises were performed by taking concentration time profile data , case studies	Enhanced ability to interpret laboratory data and make appropriate therapeutic decisions
Evidence-based decisions	It facilitated discussions on the use evidence in TDM practice. Students are encouraged to critically evaluate research articles.	Evidence-based medicine workshops, literature reviews	Improved ability to make evidence-based decisions related to TDM
Effective communication	Effective communication was promoted through structured discussions and debates. Students felt free to present their viewpoints clearly and concisely.	group presentations were given for a particular class of antibiotics	Enhanced communication skills and ability to collaborate with healthcare team was evidenced in further clinical ward rounds

This outlines the implementation steps, practice and expected outcome of therapeutic drug monitoring discussion forum.

Table 3. JNTUA B.Pharmacy First Year Pharmaceutics subject improved results

Course	Subject	Pass percentage	Pass percentage
		2022-2023	2023-2024
B.Pharmacy	Pharmaceutics	56	80

Table 3 describes the improvement in pass percentage for the Pharmaceutics subject in the first year of the B.Pharmacy course at JNTU University. It compares the pass percentage of the Pharmaceutics subject between the academic years 2022-2023 and 2023-2024, showing a significant increase from 56% to 80% respectively.

MINI PROJECTS

Implementation of Mini Model Projects as hands on experimental models

Instructions given in class room	Subject enrichment concepts	Implementation through Mini Models	Student Academic Enrichment
Demonstration of understanding of unit operations	knowledge to practical scenarios and their application	Designing and constructing mini models (ball mills, fluid flow models)	Hands-on learning, problem-solving skills
Application of engineering principles to pharmaceutical processes	Integration of theory with practice	Analyzing the performance of mini models	Critical thinking, analytical skills
Development of problem-solving skills	problem-solving techniques application to real-world challenges	Overcoming design and construction challenges	Innovation, creativity
Enhancement of teamwork and collaboration	Working collaboratively on projects	Group assignments for model building	Interpersonal skills, teamwork
Development of practical skills	Acquiring hands-on experience	Operating and maintaining mini models	Technical proficiency
Promotion of lifelong learning	Encouragement of independent research and experimentation	Exploring different model designs	Curiosity, research skills

This table explains how classroom instruction, coupled with practical application through mini models, can contribute to student academic enrichment.

Student Electoral System: Narayana Pharmacy College

A **student electoral system** is a structured process that allows students to participate in electing their peers to various leadership positions within a school or college. This system is designed to promote democratic values, encourage student involvement in governance, and develop leadership qualities.

ELECTORAL COMMITTEE:

1. The Electoral Committee will consist of 5 members:

- 2 student representatives (elected by students)
- 2 faculty representatives (elected by faculty).

A model electoral system enhances student participation, leadership development. Student government having apex body responsible for student welfare. Elected representative from each class called class representatives from each academic year. A neutral body independent electoral commission (IEC) oversee electoral process. Electoral process was issued by IEC, eligibility criteria for all student candidates given. In this 15 days of designated period for candidates to campaign was allowed, followed guidelines for fair competition. Elections were conducted using a secret ballot system. IEC should oversee the counting of votes and announce the results. Dispute resolution mechanism was established. Suggestion box is a powerful tool to enhance student governance.
