1. Purpose

The purpose of the Water Conservation Policy at Narayana Pharmacy College is to ensure the sustainable use and conservation of water resources, reduce water wastage, and promote water efficiency across all college operations and activities.

2. Scope

This policy applies to all water use within Narayana Pharmacy College, including drinking water, sanitation, landscaping, and laboratory use. It encompasses all buildings, facilities, and outdoor areas on campus.

3. Policy Making

The Water Management Policy is formulated by the Water Conservation Committee, which includes representatives from various departments, administrative staff, and student bodies. The committee is responsible for setting water conservation targets and developing strategies to achieve them.

4. Effective Measures

- **Water Audits:** Conduct regular water audits to identify areas of excessive use and opportunities for water-saving measures.
- **Efficient Fixtures:** Install water-efficient fixtures, such as low-flow taps, toilets, and showerheads, throughout the campus.
- **Rainwater Harvesting:** Implement rainwater harvesting systems to collect and use rainwater for non-potable purposes, such as irrigation and cleaning.
- **Water Recycling:** Establish water recycling systems to treat and reuse wastewater for appropriate purposes.
- **Leak Detection and Repair:** Develop a program for the timely detection and repair of leaks in plumbing systems to prevent water wastage.

- **Awareness and Education:** Conduct regular workshops, seminars, and campaigns to educate the college community about the importance of water conservation and ways to save water.

5. Implementation

The implementation of the Water Conservation Policy involves:

- **Water Conservation Committee:** Overseeing the implementation of the policy and coordinating water conservation activities across departments.
- **Water Monitoring System:** Establishing a system to monitor water usage and track progress towards water conservation goals.
- **Training Programs:** Providing training for staff and students on water-saving practices and technologies.
- **Infrastructure Upgrades:** Investing in infrastructure upgrades to improve water efficiency, such as replacing old pipes and fixtures with more efficient alternatives.

6. Problem Solving

Addressing water-related issues involves:

- **Feedback Mechanism:** Establishing a feedback mechanism for staff and students to report water issues or suggest improvements.
- **Action Plans:** Developing action plans to address identified issues, with clear timelines and responsibilities.
- **Collaboration:** Engaging with external organizations, government agencies, and the local community to leverage expertise and resources for water conservation.

7. Responsibility

The Water Conservation Committee, led by a designated Water Coordinator, is responsible for the overall management and execution of the Water Management Policy. All members of the college community are expected to support and participate in the implementation of the policy.

8. Evaluation

Regular evaluations will be conducted to assess the effectiveness of the policy, with adjustments made as necessary to ensure continuous improvement and alignment with best practices in water conservation.

By adhering to this Water Conversation Policy, Narayana Pharmacy College aims to use water resources responsibly, reduce its environmental footprint, and set an example for sustainable water management practices in the community.
